AGRICULTURAL.

How to Have Good Roads and Other Good Things.

There are many reasons why the farmor should be interested in the subject of roads. In all rural towns he pays the largest share of tax for their support. The farmer is the principal builder and repairer of the roads. Hence if his work is wisely planned out, it will result not only in good roads, but in wise expenditure of means employed. One man with a gang of men and teams will do twice as much on a highway as another man with the same help in the same time, taking into account not only the amendment of the road for present travel, but for the preser-vation. He should study up and learn all these conditions that conduce to a good road and its preservation. * * He pays for them, he constructs them, he uses them, so that to him, good, safe, perma-nent roads are of the most vital importance, But good, safe roads are also valuable to every tax payer and resident in the town-ship. The value of all property is en-hanced by good roads, more than their cost, and the comfort and safety they bestow are so much added to the clear profit of the in-

Thus says Secretary Gold of the Connecticut board of agriculture, and all farmers will concur. But how are we to improve the roads? There is one indispensable first condition. We cannot have good roads in neighborhoods where there aml a sufficient amount of taxable proper- rives. ty to maintain them. Very sparsely settled districts must necessarily have poor roads unless, as is sometimes the case, a road passing through a thinly inhabited neighborhood is maintained wholly or partby at the expense of the more populous distriets which the road connects. Herein is shown one of the many facts which illustrate the interest of the community in keeping up the occupancy of the farms. Better roads, better schools, better libraries, better preachers, better social privileges, and, in general, lighter taxation would follow as a consequence of a large increase of population in the farming or this proposition is true. Let us encourage honest people from other states and from other countries to make homes among us. If the population of our country lowns was increased 100 per cent the whole would find better support than does the half. There is not a single good reason average of the states in growth of popula-

Condition of the Wheat Crop---Better Times for Farmers.

The April report of the department of agriculture states that the condition of winter wheat has been exceeded but once in tenyears, and but three times during the history of crop reporting by the department. The returns indicate nearly as perfect a condition of the crop as it is possible to reach. Concerning the world's supply of wheat the report says:

"It is not true that the wheat of the world is declining. It is not difficult to prove the existence of 2300 million bushels as an average, and there is no prospect of decrease. Annual fluctuations, from climatic causes will produce variation in price, which the distribution of harvests of different climates through the year and increase of interna-tional transportation facilities will help to equalize. The United States will continue to produce a surplus for export, until the wheat culture of the plains shall have given place to more varied and profitable culture, and increasing numbers of non-agricultural population shall require for bread the en-

"It is proper to say that the tendency is towards a better distribution of crops, and to higher prices and greater profits. The proportion of agricultural labor will decrease, non-agricultural will increase, agri-cultural production will be more varied, rural intelligence and skill will advance, and the farmer be in better position to de-mand and secure an equitable share in the net proceeds of national industries."

Too Much Politics the Trouble.

An investigation as to the cause of the dving wheat crop in Kansas reveals the fact that the trouble is not due to the Hessian fly or chinch bug, but to the Farmers' alliance. The secretary of the state board of agriculture and Chancellor Snow of the state university have just returned from a trip through the counties in which it had been reported that the Hessian fly had made an appearance. They visited 30 damaged wheat fields in Russell county, and found in each instance that the wheat had been drilled into wheat or corn stubble, without any previous preparation of the ground. The same they profess to be true in Seward, Stafford and other western countles. A further investigation into the personal habits of the owners of these dead sheat fields reveals the unpleasant fact that as members of the alliance they attended nearly all the alliance picnics last fall, listening to denunciations of eastern Shylocks and learning how to avoid payment of their mortgages, while their neighbors were plowing. So far as could be ascertained by personal inspection and inquiry every field of wheat that was properly prepared is in excellent condition and promises well. There is a small green bug, species not known, smaller than the chinch bug, to be found in some of these fields, but the most damaged fields have no sign of it, so that the secretary of agriculture unhesitatingly declares it is not the cause of the failing crops. He declares bad farming to be the sole cause, although himself an alliance me. alliance man.

Skimmed Milk for Lambs.

More money can be got out of skim milk by feeding it to lambs than by the usual plan of throwing it to the hogs, according to the Wisconsin experiment station. Results of experiments made are given in the annual report of the station for 1890. Four lambs were taken from their mothers when about 10 days old and fed milk from a botthe four times daily for 21 days. During this time they consumed 226 pounds of full milk, gaining 39 pounds, or nearly half a pound each daily. At this rate it would require 579 pounds of full milk to make i00 pounds of gain, and valuing the milk at 60 cents per hundred, a fair summer price, the cost of 100 pounds of gain would

The lambs were next put on sweet skim milk, and fed oats with green clover and green fodder corn. For the first period of 28 days they drank 424 pounds of sweet skim milk and ate 14 pounds of oats and 32 pounds of green clover, gaining 53 pounds, or nearly half a pound each daily. At this rate 800 pounds of sweet skim milk with 26 pounds of oats and 60 pounds of green feed would make 100 pounds of gain. Valuing skim milk at 25 cents per hundred, oats at 80 cents per hundred, and green corn and clover at \$2 per ton, the feed would cost \$2.30 for 100 pounds of gain. In September the cost of 100 pounds of

gain was as high as \$4,50 and when the milk was withdrawn it cost \$4.06.

From trials in feeding pigs it was found to take 654 pounds of sweet milk and 198 pounds of eorn meal and shorts to make 100 pounds of gain, and with shotes 964 pounds of sweet milk and 92 pounds of corn meal, so the figures lead to the conclusion that pigs do not make so much the best use or their feed as is generally supposed. It has not get been learned whether lambs can be taught to drink milk from er and bake as a custard. Sauce: One cuja pall as readily as calves, but if they can, why cannot they be used to consume milk on dairy farms with profit? It will often pay to force lambs rapidly, and cannot skim milk be used for this purpose?

Spring Care of Cows.

On account of the high price of feed cows will be turned out to grass this spring earlier than usual.

It must not be forgotten that the early bite of grass is not very nutritious. While it increases the quantity of milk it will not add much to the quality.

So we must give the cows some dry feed until the grass becomes more mature.

If the ground is soft it will be better not

to let the cows remain in the field all day.

They can fill up in half a day and then
they will not tramp the pasture so much. If they are allowed to pasture during the latter half of the day they will be better satisfied than they would be if they were turned out in the morning and brought in

Besides the grass will be dryer. They will soon learn the hour for going are not a sufficient number of inhabitants out and will not fret until that hour ar-

How to Plant Trees.

towns. We have already seen in many of during the last ten years," says a nurseryreplace one that has died. The success is the result of a very simple but seldom fail-ing precaution. When the tree is planted a piece of wood not less than three inches wide, and high enough to reach the lowest branches, should be driven into the ground just south of the tree. This keeps the sun off during two-thirds of the day, and prehalf. There is not a single good reason that Vermont should fall so far behind the before new roots have been formed. Any one adopting this plan will be certain to have success with his trees no matter how poorly they look when first planted out." New York Tribune.

What Do We Plant When We Plant

the Tree! What do we plant when we plant the tree? We plant the ship which will cross the sea. We plant the mast to carry the sails; We plant the planks to withstand the gales. The keel, the keelson, and beam and knee; We plant the ship when we plant the tree. What do we plant when we plant the tree? We plant the houses for you and me. We plant the rafters, the shingles, the floors We plant the studding, the lath, the doors, The beams and siding, all parts that be: We plant the house when we plant the tree.

What do we plant when we plant the trees A thousand things that we daily see; We plant the spire that out-towers the crug, We plant the shaff for our country's flag. We plant the shafe, from the hot sun free: We plant all these when we plant the tree.

Henry Abbey.

Through the Weary Hours Of many a night, made doubly long by its pro-tracted agony, the rheumatic sufferer tosses to and fro on his sleepless couch, valuly praying for that rest which only comes by fits and starts. that rest which only comes by fits and starts. He malady is one which ordinary medicines to often fait to relieve, but there is ample evidence to prove that the efficient blood depurent. Host etter's Stomach Bitters affords the rheumatic a reliable means of relief. Check the malady in its meiplent stages, when the first premonitory twinges come on, with this agreeable medicine, and avoid years of torture. Whatever be the rationale of the active influence of the Bitters upon this malady, certain it is that no evidence relating to its effect is more direct and positive than that which relates to its action in cases of rheumatism. Like all sterling remedies, however it deserves a protracted, systematic trial, and should not be abandoned because not at once remedial. It is equally efficacious in dyspepsia, indigestion and kindred diseases.

No man is accountable for the mistakes of his friends.

In almost every neighborhood throughout the West there are some one or more persons whose lives have been saved by Chamberlain's Cohe, Cholera and Diarrhoea Remedy, or who have been cured of chronic diarrhoea by it. Such persons take especial pleasure in recommending the Remedy to others. The prais that follows its introduction and use makes it very popular. Twenty-five and fifty cent bottles for sale by E. C. Thorn.

One pint of cold cooked fish, one table-

For Over Fifty Venrs.

Mrs. Winslow's Soothing Syrup has been used for over fifty years by millions of mothers for their children while teething, with perfect success. It soothes the child, softens the grams, allays all pain, cures wind cohe, and is the best remedy for diarrhæa. Sold by druggists in every part of the world. Be sure and say for "Mrs. Winslow's Soothing Syrup," and take no other kind. Price Twenty five cents a bottle.

Bucklen's Arnien Salve. The best salve in the world for cuts, bruises, sores, ulcers, salt rheum, fever sores, tetter, chan-ped hands, chilibains, corns and all skin eruptions and positively curse piles or no pay required. It is guaranteed to give perfect satisfaction or money refunded. Price 25 cents per box. For sale by F. H. Holden & Co.

I was a sufferer for fifteen years with dis-tressing pain over my eyes. I used Ely's Cream Balm with gratifying results. Am apparently cured.—Z. C. Warren, Rutland, Vt.

A noble gift to the world, Dr. Johnson left in Johnson's Anodyne Liniment. Many bless him.

When I Was Sick My room 1 oked like a drug store, I had so many bottles in it. The more I dosed, the worse off I was. Finally, I paid my doctor and told him be needn't come any more. I was troubled with Chronic Rheumatism, and couldn't get out of bed alone. Six bottles of Sulphur Bitters cured me.—Benjamin Fitch, Adams House, Boston.

Mrs. M. L. Dare, matron of the House of Shelter, Albany, informs us that Dr. Kennedy's Favorite Remedy is used in that institution for Dyspepsia and Biliousness with great satisfaction.

They Have Never Failed.

I have been sick more or less for the last ten years, which has cost me many dollars in doctors' and druggists' bills. The last two years it only cost me three dollars. Why? Because I used Sulphur Bitters instead of employing doctors. They cured me of Jaundics.—F F. Boyd, Hobo ken.

I suffered from a severe cold in my head for months and could get no relief. Was advised to use Ely's Cream Balm. It has worked like maje in its cure. I am free from my cold after using the Balm one week, and I believe it is the best romedy known.—Samuel J. Harris, wholesale grocer, 119 Front street, New York.

Children Cry for Pitcher's Castoria.

When Baby was sick, we gave her Castoria. When she was a Child, she cried for Castoria, When she became Miss, she clung to Castoria, When she had Children, she gave them Castoria. THE HOUSEHOLD.

A Budget of Receipts.

CHOCOLATE PUBLINGS.

One pint of bread crumbs, one-fourth of a cake of chocolate grated, three-fourths of a cup of sugar, three eggs, one quart of milk and a pinch of salt. Beat all togethof sugar, butter the size of an egg, add flavoring to taste,

Heat a quart of milk to near the boiling point. Thicken with dissolved corn starch, and sweeten. Stir in half a teacup of grated chocolate. Flavor with vanilla and serve with cream when cold,

CHOCOLATE JELLY.

Take seven spoonfuls of grated chocolate, the same of white sugar, one cup of old men and aged women weak, broken, sickly sweet cream; mix together and set over the fire and let come to a boil. Pour it time. over corn starch pudding, or put between layers of cake.

RAISIN PUFF PUDDING. Two eggs, one-half cup of butter, one cup of milk, two cups of flour, one cup of tive health and strength. This has been done by raisins chopped fine, three tenspoonfuls of baking powder, and two tablespoonfuls of sugar; steam one-half hour in cups. This makes six cups. Serve with sauce: One tablespoonful each of butter, sugar and flour, and the yolk of one egg. Add hot water and let it boil, flavor, beat white If not then let out promptly they will of egg and put on top, stirring in slightly. QUICK PUDDING.

Three eggs, one small cup of flour, four tablespoonfuls of milk, two teaspoonfuls of If you have two pasture fields let the baking powder; steam in small cups for 25 minutes; this quantity will make five.

POTATO SALAD.

The pasture fence can be put in order cow, before you get so busy with spring three hard-boiled eggs, one small onion chopped fine; season with salt and pepper, and pour over dressing made of the yolk of one egg stirred into a half tablespoonful of made mustard and one teaspoonful of strong vinegar; beat in by drops three ta-"I have planted several thousands of trees | blespoonfuls of sweet cream and the white of one egg beaten to a froth.

LYONNAISE TRIPE.

One pound of tripe boiled, one onion, one tablespoonful butter, one cupful stewed omatoes, pepper and salt to taste. Brown the onion in the butter, add the tripe cut into neat pieces, add the seasoning. Brown lightly, add the tomatoes, and when these are hot serve.

LYONNAISE POTATOES.

These potatoes are quite famous for their excellence. Cut eight potatoes, boiled, into round slices; lay them in a frying pan with one and one-half ounces of butter and the round slices of a previously fried onion, and season with one-half pinch each of salt and pepper. Cook well together for six minutes until well browned; toss them well and serve with a pinch of chopped parsley sprinkled over the whole.

ROLLED BEEFSTEAK. This is a very good way of cooking an inferior steak. Take a round steak, beat it well and spread it with a dressing such as is used for poultry. Begin at one end and roll it up neatly, trying to keep it in shape. Put it in a bake pan with a little water, and bake until the meat is tender, basting it frequently, and when nearly done put a greatspoonful of butter over it. Thicken the gravy in the pan with a little flour wet up with cold water and season it

roll, slicing off the end neatly. WELSH RAREBIT.

Half a cup of milk, two cups of cheese erumbled or grated, quarter teaspoonful of baking soda, half teaspoonful of salt, yelks of two eggs. Put the milk, cheese and soda in a granite saucepan, and cook till the cheese melts, but do not let it boil; take from the fire and add the yelks and salt. Spread on fresh toasted bread, buttered and cut in squares or oblongs. A simpler preparation under the same name is made with

One pint of cold cooked fish, one table spoonful of butter, two tablespoonfuls of flour, one pint of milk, salt and pepper. Cream the butter and flour together, stir in the milk, add the salt and pepper; put over the fire in a granite saucepan and stir until it boils. Have the fish free from bones and skin, and neatly shredded into a shallow baking dish; pour over the sauce. Sprinkle the top with fine sifted bread or eracker crumbs, and place in the oven till a light brown. Any fish can be treated this way, but a whitefish, cod or halibut will look best.

Everybody Knows That at this season the blood is filled with impurities, the accumulation of months of close confinement in poorly ventilated stores, workshops and tenements. All these impurities and every trace of scrofula, salt rheum, or other diseases may be expelled by taking Hood's Sarssaparilla, the best blood purifier ever produced. It is the only meducine of which "100 doses one dollar" is true.

Don't call a spade a spade when it is a shovel.

Some of the Grand Army boys may be interested in the following from Alexander B. Pope, A. D. C., Commander, Department, Tennessee and Georgia. He says: "We had an epidemic of whooping cough here, (Stewart, Tenn.) and Chamberlain's Cough Remedy has been the only medicine that has done any good." There is no danger from whooping cough when this reneety is freely given. It completely controls the disease, Fifty cent bottles for sale by E. C. Thorn.

Costiveness is the primary cause of much dis-ase, Dr. Henry Baxter's Mandrake Bitters will sermanently cure costiveness. Every bottle war-

Are you troubled with Blood Disorders, Dys-pepsia, Liver Complaint, Constipation, or De-rangement of the Kidneys and Bladder? Then use Dr. Kennedy's Favorite Remedy. It will not disappoint you.

In Henry & Johnson's Arnica and Oil Liniment is combined the curative properties of the different oils, with the healing qualities of Arnica Good for man and animal. Every bottle guaranteed. All cases of weak or lame back, backache, rheu-natism, will find relief by wearing one of Carter's smart Weed and Belladonna Backache Plasters. Price 25 cents. Try them.

"Tired all the Time" Say many poor men and women, who seem overworked, or are debilitated by change of season, climate or life. If you could read the hander's of letters praising Hood's Sarsaparilia which come from people whom it has restored to health, you would be convinced of its merits. As this is impossible, why not try Hood's Sarsaparilia yourself and thus realize its benefit? It will tone and build up your system, give you a good appetite, overcome that tired feeling and make you feel, as one woman expressed it, "like a new creature."

"A stitch in time" often saves consumption Down's Elixir used in time saves life. Kidney troubles if taken in season are easily ured with Johnson's Anodyne Linim at. Fact.
